## Communication Engineer (PM)

### Description

#### Overview

We are seeking an experienced Engineer who is specialized in Communication Engineering to join our client who is based in Saudi Arabia.

The primary role is to ensure that engineering design, procurement, construction and project completion is done in compliance with the project objective and contractual requirements i.e. project schedule, cost, HSE, company standards and procedures. The role also involves review and study of grass root and brown field refining and petrochemical facilities.

#### Duties and Responsibilities

You will be required to perform the following:

Execute capital projects according to the scope, schedule and budget.  
Perform complex technical and administrative tasks relative to the Design and coordination of communication systems.  
Provide the technical input and review of the design, construction, pre-commissioning, commissioning and startup of facilities.  
Address technical issues arising in all phases of the project development related to communication packages of the facilities.  
Responsibility for project development: engineering studies, technical bid reviews, preliminary engineering, detail designs, materials procurement, construction, pre-commissioning, handover, commissioning and startup.  
Review and provide input to the Functional Specification for communication equipment that fully comply with our client's standards and specifications.  
Manage General Engineering Services (GES) design contractor activities during the development of Pre-FEED & FEED, including definition of project work scope and schedule requirements. Development of detailed estimate leading to funding appropriation and approval.  
Be familiar with international procedures of Projects Phases, Engineering Phases, Bidding procedures, Procurement Processes, Construction Requirements and up to date Best Practices.  
Full understanding of contract documents (inclusive of appendices, drawings and specifications), project execution plan, interface management, change management, construction sequencing, standards specifications and project schedule to support project manager and/or company representative in timely completion of projects.  
Review and resolve day to day contractors' activities related to assigned project (communication) work during construction and ensure HSE compliance.  
Participate in developing communication deliverables and others such as BDs, I/O lists, ILDs, ISDs, specification sheets, communication protocols, C&E diagrams, HAZID, HAZOP, SIL, control narrative, startup plans, etc.  
Provide design input in the identification, sizing, selection and procurement of field communication devices.  
Attend Factory Acceptance Test (FAT) of the communication equipment and resolve any technical issue prior of shipment to site.  
Conduct Site Acceptance Test (SAT) and Integration Site Acceptance Test (ISAT) for all communication equipment and resolve any technical issues that arise.

### Hiring organization

FVJ Europe Ltd

### Employment Type

a:1:{i:0;s:9:"FULL\_TIME";}

### Duration of employment

1 year renewable (residential)

### Industry

Oil and Gas
