Safety Engineer – PD&T

Description

Overview

We are seeking a Safety engineer to join our client in Saudi Arabia.

Your primary role is to be proved and assist with planning, establishing, implementing, and maintaining a variety of safety and environmental measures and initiatives to ensure compliance with corporate and local department HSE requirements and expectations.

Key Responsibilities

You will be required to perform the following:

- Provide advice and consultation to department staff to assist them in maintaining a safe working environment in compliance with environmental/safety regulations, standards and practices.
- Identify and evaluate hazardous conditions and practices in the workplace.
- Provide advice and counsel concerning compliance with corporate safety regulation and procedures.
- Perform job site safety compliance inspections including hazard analyses and safe work procedures, and prepares written reports and recommendations.
- Measure and evaluate the effectiveness of the hazard control system, policies, and procedures and recommends changes that reflect improved opportunities to eliminate work place incidents and injuries.
- Prepare safety orientations, safety training, and job site inspection procedures and conduct specialized safety and environmental training programs to communicate hazard control information.
- Review and analyze injury, property damage, and statistical loss data and works with management to prepare comprehensive recommendations for corrective action to eliminate or minimize potential hazards.
- Incorporate essential safety requirements in all purchasing and contracting actions and recommend the purchase of safety equipment, related supplies, and personal protective equipment (PPE) in accordance with established company requirements.

Minimum Requirements

- As a successful candidate you will hold a Bachelor degree in engineering, safety engineering, industrial hygiene, or environmental science, or in a related field is preferred.
- You should have eight years of related safety/operational experience and/or training, preferably in the oil/gas or petrochemical industry, or in the industry related to the position placement, e.g., marine, • pipelines, power distribution.
